

JETLESS CLEANING TECHNOLOGY

Revolutionary and better than ever!

We listened to you and:

- Increased the solution flow by over 50%
- Enlarged the cleaning head by 20%
- Equalized the solution flow across the bar jet
- Combined the flow control and on-off valve into one control knob
- Improved the swivel hose and cuff assembly
- Added optional grip for cleaning divider and chair backs
- Comes with a protective head cover
- Optional ergonomic grip handle

Revolutionary

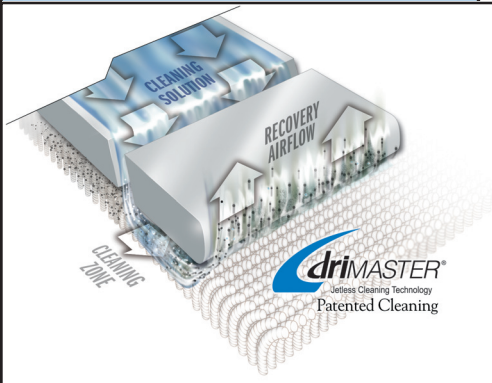

The most popular upholstery cleaning tool in the industry has been improved!

All these improvements while maintaining the features that made the DriMaster upholstery tool the top selling upholstery cleaning tool in the world.

- No overwetting or overspray
- Never a need for a dry or vacuum pass
- No trigger valve
- Lightweight and comfortable to use
- Fabrics left 50% drier than all other conventional tools

Fabrics left so dry, it takes the worry out of upholstery cleaning.

DM2 DriMaster Upholstery Tool - March 2008

HydraMaster's patented DriMaster Upholstery Tool is unlike any tool you have ever used. Using new Jetless Cleaning Technology, it has no trigger valve, no spray jet, and never needs a second drying-pass. The solution is under constant flow, trained by the patented injector bar and slotted vacuum port system. The result is a highly effective cleaning tool that works without over-wetting or on-off heat loss. Even narrow areas can be cleaned without any over-spray.

Durable, but lightweight, the DriMaster Upholstery Tool weighs less than half of other upholstery tools. The new Jetless Cleaning Technology eliminates the need for a trigger valve so multiple holding positions are possible, lowering the potential for hand strain. No second pass, no over-spray and high-volume water flow all contribute to the efficiency and speed of cleaning.

Creating a hyper-velocity fluid stream instead of a spray jet, the DriMaster Upholstery Tool cleans better with no heat loss and less operator fatigue.

- No trigger valve for less hand strain
- No heat loss from atomizing solution
- Lightweight with comfortable handgrip
- High Flow/low residual moisture super cleaning shears away soil
- Cool to the touch
- Durable - virtually unbreakable
- Low profile design fits in tight spots

Cleaning with the DriMaster Upholstery Tool is just plain faster. The high flow – low residual moisture effect of this new technology leaves the fabric cleaner and drier while greatly reducing the chances of damage.

Each upholstery tool comes with a protective head cover.
